# Premium and Intelligent Video Experience

— provides an immersive conference environment

- 4K Built-in Camera
- Professional SONY Image Sensor
- 12X/6X Detachable Optional PTZ Camera for Larger Spaces
- Electronic Privacy Shutter

(first in the industry)

## Intelligent AI Features

Auto Framing | Speaker Tracking | Picture-in-Picture\* | Smart Gallery\* | Multi Framing\*

### Auto Framing

Auto framing recognizes the number and the positions of attendees, framing everyone smoothly in the most appropriate view even in small spaces.

### Speaker Tracking

Speaker tracking frames a real-time close-up on the presenter, bringing a vivid face-to-face meeting experience and ensuring attendees are well-engaged.

### Picture-in-Picture

Based on speaker Tracking, users can switch to Picture-in-Picture (PiP) mode when starting a meeting. PiP tracks and frames the speaker in an individual window, which is separate from the other window, for a panoramic view, enabling users to keep an eye on who's talking even if the speaker is seated at a distance in a medium room.

# Designed with Simplicity and The Beauty of Details in Mind

—adds elegance and turns all your rooms into a collaborative workspace.

The MeetingBoard is completely encased in a metallic material. This enhances the texture, extends the product's service life, and is more environmentally friendly.

Choose between the movable floor stand, sculpted like the legs of a ballet dancer, or the wall mount.

4 universal casters allow you to move the MeetingBoard around easily.

Thanks to the single-cable setup, you can get started within minutes.
